iConnector - SMART IOT GATEWAY

STHC is a Smart IoT Gateway, aka iConnector, a main component in any IoT application. iConnector has a role to connect the real World's things like sensors, meters, machines...to server system for data logging, data analytics, monitoring & controls...iConnector support multiple Industrial Fieldbus like Modbus, EthernetIP, Profinet, CCLink, Wireless sensor network...It connects to server system via LAN/WAN as Ethernet, WiFi or Cellular.

iConnector is a 3-in1 device, comprises Data logger + Logic Controller + Internet Gateway

Don't need to learn any Programming language, just configure it remotely by Globiots platform

Just install and configure it remotely on Globiots, then you can start use it!

Support multiple Fieldbus protocols like Modbus, EthernetIP, Profinet, Ccink...

Industrial customers have been using iConnectors since 2014 because of its quality!
